#### **INTRODUCTORY NOTES**

#### 1. Demographic characteristics

#### 1.1 Population

The resident population of the Republic of Mauritius was estimated at 1,288,684 as at 31<sup>st</sup> December 2011, of whom 653,854 were females (634,503 in the Island of Mauritius and 19,131 in Rodrigues). The percentage of women was 50.7% in the Republic of Mauritius. In 2011, the mean age of women in the Island of Mauritius was 35.3 years against 33.7 for men.

#### 1.2 Births

Women gave fewer births in 2011 as compared to 2010. The number of births occurring in the Republic of Mauritius in 2011 was 14,701 compared to 14,831 in 2010. The crude birth rate for the Republic of Mauritius was 11.7 for 2010 and11.4 for 2011 and the total fertility rate which can be calculated as the average number of children born per woman was 1.47 and 1.45 respectively for 2010 and 2011.

#### 1.3 Deaths

In 2011, 9,170 deaths were registered in the Republic of Mauritius compared to 9,131 in 2010. Lower mortality was observed for women than for men, with crude death rate being 8.3 for men and 6.0 for women.

Among men, the leading causes of death were diabetes (22.8%) followed by heart disease (17.4%) in 2011. In the case of women, 28.9% deaths were due to diabetes, followed by heart diseases (17.3%).

Diseases specific to women such as breast cancer, cervical cancer, cancer of uterus including cervix uteri and 'complications of pregnancy and childbirths' resulted in 4.7% of all deaths among women. On the other hand, 'prostate cancer', which is applicable to men only, was the cause of 1.1% of death among men.

#### 1.4 Marriages

In the Republic of Mauritius, the number of registered marriages decreased from 10,555 in 2010 to 10,499 in 2011. In the Island of Mauritius it decreased from 10,370 in 2010 to 10,334 in 2011 whereas in Rodrigues it decreased from 185 to 165 for the same periods. For the Republic of Mauritius, the crude marriage rate, defined as the number of persons getting married per 1,000 mid-year population, stood at 16.5 and 16.3 for 2010 and 2011 respectively.

#### 1.5 Divorces

Divorces at the same time, decreased from 1,837 in 2010 to 1,788 in 2011 for the Republic of Mauritius.

#### 1.6 Marital status

2011 Population Census data on marital status for the Republic of Mauritius revealed that the proportion of single (never married) persons was higher among males than females. About 33% of males were single against 22% for females, mainly because women tend to get married at an earlier age than men.

Widowhood was found to be higher among women than among men as a result of a higher life expectancy among women. About 14% of women were widowed against 2% for men.

The proportion of married was about 60% among men and 58% among women.

#### 1.7 Life expectancy

There has been a general improvement in life expectancy over the years though improvement was more pronounced among females. This has led to a general increase in the gap in life expectancy at birth between males and females, from 4.9 in 1972 to 7.3 in 1983, 7.8 in 1990 and then to 7.1 in 2000. The life expectancy at birth for 2011 in the Republic of Mauritius was 80.1 years for women compared to 69.8 years for men.

#### 2. Education

Both 1990 and 2000 Population Censuses data reveal that the overall educational attainment for women in the Republic of Mauritius is lower than that for men. Among those aged 15 years and above, 79.4% of women had attained primary education or higher against 91.4% among men in 1990, whilst in 2000, the corresponding figures were 86.4% and 94.7% respectively.

The primary school population in the Republic of Mauritius was 116,068 in 2011 compared to 117,432 in 2010 (Table 4.4). Boys represented 51% of the 2011 primary school population and girls 49%. The Gross Enrolment Ratio (primary enrolment as a percentage of the population aged 6 to 11 years) was 100% for boys and 100% for girls.

However, at secondary level, the Gross Enrolment Ratio (GER) is higher for girls than for boys. The 2011 Gross Enrolment Ratio was 74% for girls against 66% for boys.

Regarding overall performance in examinations, it is observed that girls do better than boys. In 2011, the pass rates for the Certificate of Primary Education (CPE) was 74.9% for girls as compared to 62.7% for boys. For the School Certificate (SC) examinations, girls recorded a higher pass rate, 81.2% against 71.8%. The pass rate for girls at the Higher School Certificate (HSC) was 82.3% against 75.3% for boys.

#### 3. Activity status

Statistics show that women are less economically active compared to men. In 2011, 43.8% of women aged 16 years and above were active against 75.5% among men of the same age.

In 2011, around 37% of working women were either employed as plant and machine operators or engaged in elementary occupations. About 18% of them were service and sales workers.

Among employed women, 28.7% drew a salary of up to Rs 4,000 compared to 7.9% among employed men. The average monthly income in 2011 was lower for women than for men, Rs 11,000 against Rs 16,400.

In 2011, women comprised about 32% of the persons employed in the Government services (Central and Local Government). About 68% of those employed in various ministries were technicians, associate professionals and clerks.

#### 4. Persons with disabilities

Up to date figures on persons with disabilities are obtained from statistics of beneficiaries of invalidity pension. These persons should however be certified by the medical board to be either permanently or substantially incapacitated to work to a degree of at least 60% for a period of at least 12 months. In the Republic of Mauritius, the number of such persons as at December 2011 was 43,455 (19,117 men, 24,338 women).

#### 5. Domestic Violence and Child Abuse

The total number of cases (new and follow up) registered at the Family Support Bureaux has decreased by 53.1% from 22,337 in 2010 to 10,481 in 2011.

The main cause of family problems identified in new adult cases reported in 2011 was verbal assault followed by physical assault, alcoholism, extra marital affairs and interference of in-laws.

The total number of cases reported at the Child Development Unit of the Family Support Bureaux decreased from 6,021 in 2010 to 5,981 in 2011.

#### 6. Children

#### 6.1 Child population

In 2011, 26.0 % of the population in the Republic of Mauritius were less than 18 years compared to 26.6% in 2010. The corresponding figures for the Island of Mauritius and Island of Rodrigues for 2011 were 25.7% and 36.4% respectively.

#### 6.2 Juvenile offences

The number of juveniles involved in offences in the Republic of Mauritius increased from 648 in 2010 to 701 in 2011. The juvenile delinquency rate thus increased from 5.2 in 2010 to 5.8 in 2011.

In 2011, the juvenile delinquency rate for the Island of Mauritius was 6.0 and that for Rodrigues 0.9.

In the Republic of Mauritius in 2011, the most common juvenile offence was assault (41.8%) followed by larceny (19.1%).

#### 6.3 Orphans

As at December 2011, the number of beneficiaries of Basic Orphan's pension aged under 19 years in the Republic of Mauritius totaled 371, among which 176 were females and 195 males.

# CONCEPTS & CONCEPTS CONCEPTS CONCEPTS CONCEPTS

#### **CONCEPTS & DEFINITIONS**

· The age which divides the population into two equal-size groups, one of which 1. Median age is younger and the other older than the median. 2. Crude birth rate : The number of live births registered in a year per 1,000 mid-year population. 3. General fertility rate : The number of live births occurring in a year per 1,000 women aged (15 - 49) years at mid-year. 4. Total fertility rate : The average number of children born to an average woman assuming that she survives to the end of her child-bearing age and is subjected to a fixed schedule of age-specific fertility rates. 5. Gross reproduction : The average number of daughters born to an average woman assuming that she survives to the end of her child-bearing age and is subjected to a fixed schedule rate of age-specific fertility rates. 6. Net reproduction rate : The extent to which an average woman will replace herself assuming a fixed schedule of age-specific mortality and fertility rates to prevail through her reproductive span of life. 7. Crude death rate : The number of deaths in a year per 1,000 mid-year population. 8. Infant death : Death of an infant aged under one year. 9. Infant mortality rate : The number of infant deaths in a year per 1,000 live-births during the year. 10. Under 5 mortality rate : The number of deaths of children aged under 5 years in a year per 1,000 live-births during the year. 11. Still birth : A child born after the twenty-eighth week of pregnancy and not breathing or showing any signs of life at any time after being completely expelled from the mother.

12. Maternal mortality rate: The number of deaths due to pregnancy, childbirth and the puerperium per 1,000 live births during that year.

13. Marriage rate : The number of persons married in a year per 1,000 mid-year population.

14. Divorce rate : The number of persons divorced in a year per 1,000 mid-year population.

15. Enrolment rate

(i) Primary : The number of students (including students of less than 6 years or greater than 11 years) enrolled per 100 population aged (6-11) years.

(ii) Secondary : The number of students enrolled per 100 population aged (12-19) years.

16. Economically active

population

: The economically active population is made up of the employed and the unemployed populations. The employed population consists of persons, who are working while the unemployed population consists of persons who are not working but who are looking for work and are available for work.

population

17. Not economically active: The inactive population is neither employed nor unemployed and consists mainly of students, homemakers, retired persons and the

disabled.

: Total Government services include both Central and Local 18. Government Services

Governments but exclude Extra Budgetary Units (EBUs).

<sup>&</sup>lt;sup>1</sup>In September 1997, the Family Counselling Service (FCS) was renamed the Domestic Violence Intervention Unit (DVIU). It later on (August 2003) merged with other services (as the Child Dev. Unit) & was known as the Integrated Services Centre (ISC). As from June 2004 it was renamed the Family Support Bureau (FSB).

<sup>&</sup>lt;sup>2</sup>Also includes child cases as from **August 2003** as all services (FCS, CDU & DVIU) were integrated to a single service (ISC now FSB). However, cases by 'nature of problem<sup>3</sup> refer to **adult cases only**.

## MISCELLANEOUS

Table 10.1 - GII by selected countries, 2011

| Country        | Rank | Value |
|----------------|------|-------|
| Sweden         | 1    | 0.049 |
| Netherlands    | 2    | 0.052 |
| Singapore      | 8    | 0.086 |
| France         | 10   | 0.106 |
| Australia      | 18   | 0.136 |
| United Kingdom | 34   | 0.209 |
| Mauritius      | 63   | 0.353 |
| South Africa   | 94   | 0.490 |
| Iraq           | 117  | 0.579 |
| Kenya          | 129  | 0.617 |
| India          | 130  | 0.627 |
| Yemen          | 146  | 0.769 |

Note: The Gender Inequality Index (GII), introduced by the United Nations in 2010, is a composite measure reflecting inequality in achievements between women and men in three dimensions, namely reproductive health, empowerment and the labour market. It varies between zero (when women and men fare equally) and one (when men or women fare poorly compared to the other in all dimensions).

According to the latest figures published in the 2011 UN Human Development Report, Mauritius ranked 63rd out of 146 countries with a GII value of 0.35.

Sweden ranked first with a value of 0.05 and Yemen last with a value of 0.77.
